Expect more from TDAM

At TDAM, we are dedicated to developing innovative solutions that can help investors meet their investment goals. Our expanding ETF suite leverages the experience and expertise of our broad investment teams and aims to deliver value with a best-in-class investing experience at competitive fees.

We have more solutions, more choices and more opportunities for your evolving investment needs across multiple management styles.

Expect more

Broad-Market Index

Our broad-market index ETFs provide a cost-effective way to gain exposure to broad indexes or specific market segments. These ETFs are considered passively managed investments as the Portfolio Managers seek to replicate a specific index with the goal of matching that index's performance.

Environment, Social, Governance (ESG)

Our ESG ETFs leverage Morningstar® and a globally recognized ESG ratings and research firm and Morningstar company Sustainalytics to deliver a differentiated ESG offering for investors, providing access to best-in-class ESG companies with close tracking to the broad parent index. These ETFs are designed to provide exposure to companies that exhibit lower ESG risk ratings relative to their peers. The lower the ESG risk rating, the better.

Special Focus

Our special focus ETFs seek to provide investors with targeted exposures to specific market segments such as sectors, geographies or maturity and credit in the case of fixed income. They focus on securities of companies in unique sectors, regions or strategically invest in asset classes with certain characteristics.

Active Quantitative

Quantitative ETFs use a rules-based process to identify and select securities based on specific characteristics, or “factors”, that have historically generated persistent above-market returns or lower risk such as: Value, Size, Momentum, Volatility, Quality and Yield. These ETFs capitalize on the expertise and innovation of TDAM’s Quantitative Equity team, which has over 150 years of combined experience and was among the first to bring low volatility strategies to Canada.

Active Fundamental

TDAM actively managed ETFs leverage the deep expertise of our Portfolio Managers, extensive research teams, and employ a rigorous investment process that identifies compelling investment opportunities. These ETFs aim to outperform their benchmarks and are designed to provide investors with strong risk-adjusted returns.

Asset Allocation

The all-in-one portfolios provide a convenient, one-stop solution for investors to access an outcome oriented, well diversified portfolio of TD ETFs. These ETFs are designed to combine the value of asset allocation with the cost-efficiency of ETFs.
